## WHAT IS HOME HEALTH?

Home health care is a medical service provided by a skilled medical professional in the comfort of a patient's home. It is often prescribed as part of a care plan following hospitalization or outpatient surgery. Your physician will decide whether this type of care is right for you.

Home health care is usually less expensive, more convenient and just as effective as care provided in a hospital or a Skilled Nursing Facility.

## WHAT IS IN-HOME REHAB?

In-Home Rehab is a non-medical service that is a vital part of the recovery process, focused on maximizing your strength, endurance, and balance with practical activities and even your favorite hobbies. GrandCare provides In-Home Rehab services in the comfort and convenience of your home.

### WHO PAYS FOR HOME HEALTH SERVICES?

Home health benefits are included in most Medicare Part A, HMO and commercial insurance plans.

### WHO PAYS FOR IN-HOME REHAB SERVICES?

Medicare Part B and most commercial insurance plans cover In-Home Rehab. GrandCare also offers private pay options. Contact us to see if your plan covers our services!

## HOME HEALTH SERVICES

- Orthopedic Rehabilitation
- Total Joint Rehabilitation
- Physical Therapy
- Occupational Therapy
- Speech Therapy

- Occupational Therapy
- Speech Therapy

## ORTHOPEDIC PROGRAM

We have optimized our therapy program to provide you with a safe and speedy recovery, providing all the information that you need about your home rehabilitation to get you back to living an independent lifestyle.

GrandCare will send a Nurse or Physical Therapist to your home following your surgery. Upon admission to GrandCare's services, we will begin your plan of care, which may include wound care, medication management, patient education and home exercise programs customized to your physician's preferences. Patients are typically discharged to outpatient therapy within three weeks.

GrandCare is available to provide In-Home Rehab in the home setting. Contact us to learn more about how GrandCare can provide a full range of orthopedic rehabilitation services to expedite your recovery.
